Study Suggestions: Keeping up is probably the most important thing you can do in this class. Many students find they spend at least 10 hours per week outside of the classroom studying for CHM 2212. I suggest the following methods that many successful students tend to employ:

- 1) attend every lecture and recitation.
- 2) try to read the next few sections of the text we are to cover before lecture.
- 3) diligently work most if not all of the problems I suggest in the text; these should be done well before the night before a quiz!
- 4) come prepared to ask questions at recitation.
- 5) study in 1-2 hours increments frequently, instead of infrequent marathon sessions.

Online Help: I am available for online help frequently. The way to do so is via AOL's Instant Messenger service. My screen-name is "CHM2211". If you want to check and see whether I am likely in my office or at a meeting, etc., check my online date book here: <http://www.icalx.com/html/bausch/day.php?cal=Work>

Course Goal:

To further your *understanding* of the fundamentals of organic chemistry.

Note: It is the policy of Villanova University to make reasonable academic accommodations for qualified individuals with disabilities. If you are a person with a disability, please make arrangements to register with Nancy Mott at the Learning Support Office (610-519-5636 or nancy.mott@villanova.edu) as soon as possible. Registration is needed in order to receive accommodations.

Please be respectful to your peers: arrive promptly for class, turn off all electronic devices (i.e. cell phones), and pay attention.
