	<p>I really appreciated how much effort Prof. Evans put in to the course...the homework assignments and class lectures had a lot of thought and time put into them, he tried really hard to make a somewhat intimidating subject approachable.</p> <p>This class was very attractive because it said that there was no need for background in coding. However, I found it the most difficult of all my classes because although there was no experience needed, simply the difficulty of learning a new language and applying it to different situations was very hard and a person who did have a background in coding might have felt very well more comfortable and a transition into another language less painful than starting from scratch. However, I was glad that there was a large amount of material not related to coding but general computer science that was quite fascinating.</p> <p>This is the only class that I have taken in the Engineering School and was pleasantly surprised, but I almost think the problem sets should be made into a lab, they each took between 3-4 hours. I don't know how CLAS differs from the E-School but I have spent MUCH MUCH more time doing work for this course than I have any other 3 credit course. Also, the text book, while interesting, actually didn't help me to understand the course material and was intimidating and challenging in a not so good way.</p> <p>This class was amazing. It was really challenging, and the instructor was really knowledgeable. I really learned a lot about an intimidating subject. That said, the class was a huge time commitment and a lot of work. I have never put so much time into a 3 credit course before. Maybe it should be 4 credits?</p>
