

Artificial intelligence (and Searle's objection)

COS 116: 4/29/2008

Sanjeev Arora

Artificial Intelligence

- Definition of AI (Merriam-Webster):
 - The capability of a machine to imitate intelligent human behavior
 - Branch of computer science dealing with the simulation of intelligent behavior in computers
- Learning:
 - To gain knowledge or understanding of or skill in by study, instruction, or experience
 - Machine learning (last lecture) - branch of AI

Intelligence in animal world

Is an ant intelligent?

- Build huge, well-structured colonies organized using chemical-based messaging (“Super-organism”)

What about dogs?
