Text: Brief Applied Calculus, Third Edition, by Geoffrey C. Berresford and Andrew M. Rockett, Houghton Mifflin Company, 2003.

Be sure that you have registered for a recitation that is associated with the lecture that you are attending. A graphing calculator is very useful for this course because some of the Practice Problems require a graphing calculator. A quiz will be given in recitation almost every week of the term. Your instructor will assign homework problems one week before they are due. Homework and quiz grades will be based on your **best 10 scores**. There will be **no make-up** for exams, homework assignments, or quizzes. You should read each section before the lecture on that section.

Final Examination Policy: A student's course grade in Math 0120 should not normally exceed his/her grade on the Math 0120 Departmental Final Examination by more than one letter grade. Exceptions to this rule must be approved by the Math 0120 Course Leader.

Grading Policy:

Homework Assignments	10%
Quizzes	15%
Exam#1	15%
Exam#2	15%
Exam#3	15%
Departmental Final Exam	30%

Tentative Course Outline:
