

# Unix System Administration

**Chris Schenk**

Lecture 21 – Thursday Apr 05

CSCI 4113, Spring 2007

# Logistics

- Avenade talk NEXT Tuesday after class in ECCR 155
  - April 10th
- Lab07 is out, Postfix and Dovecot with SASL
  - And a hint-'o-Perl
- DNS Delegation

# .forward Files

- Users can forward mail to another location
  - .forward behaves similarly to alias files
- File exists in user's home directory
  - Permissions must be only readable and writable by owner!
- Can cause mail loops if not carefully managed
  - Internal alias loops are handled by servers, not forwarding loops
- Syntax:
