

# CISC181 Introduction to Computer Science

Dr. McCoy

Lecture 19  
Clicker Questions  
November 3, 2009

If a class is named MyClass, what must the constructors be named?

(a) Initializer

(b) MyClass

(c) Any name the programmer wishes except the name of the class

(d) ~MyClass

(e) None of the above.

## Referencing elements outside the array bounds

- (a) can result in changes to the value of an unrelated variable
- (b) is impossible because C++ checks to make sure it does not happen
- (c) is a syntax error
- (d) enlarges the size of the array
