

collaborative development of interactive software systems teamwork

alexandre r.j. françois

visiting assistant professor of computer science
tufts university

research assistant professor of computer science
viterbi school of engineering, university of southern california

outline

project organization
team organization
tools

project

challenges

- complex – more than just writing a few functions
- short time – work collaboratively
- need to organize!

questions:

- what is the project goal?
- what is success? metrics?
