

# Algorithms, Programs, and Computers

CS 110

Fall 2005

# Problem Solving

- You want to make money and you have some simpletons who are willing to help
  - **Devise a plan** that will make money (write a business plan for starting a restaurant)
  - Tell the simpletons to **execute the business plan**

# Problem Solving

- The simpletons can make mistakes
  - Refine the communication of instructions to them
    - Use time cards, tables, flow charts, pictures
    - Develop a bullet proof “process”
