

# Digital Forensics

**Lecture #18**

**Guest Lecture**

**Rod Gregg**

**Visit to FBI Labs North Texas**

**October 5, 2007**

## Rules for Visit

- I checked with our lab director and a tour with your class on Friday, Oct 5th at 10am is approved.
- What we ask is that you bring only US citizens, no foreign nationals for security reasons. Students are not allowed to have on their person cell phones which have camera, audio recording or blue tooth capability. They are not allowed to have cameras, video or audio recording devices or of course, weapons of any kind.
- All visitors must sign in and show identification. They will be escorted at all times and not stray from the group. Anyone that doesn't follow the rules may be subject to search at any time or they may be escorted from the controlled space. This is a federal facility.

## Rules for Visit

- My plan is to give a guided tour and then retire to our training laboratory for more questions about computer forensics in general and particular questions your students have that are within our ability to answer.
- For driving and parking instructions, please go to this weblink:
- [http://www.ntrcfl.org/Law\\_Enforcement/Case\\_Submission/Map/map.html](http://www.ntrcfl.org/Law_Enforcement/Case_Submission/Map/map.html)
