

## 95-702 Distributed Systems

### Distributed Objects Using Java RMI

# Objectives

- Understand distributed objects
- Understand Java RMI
- Be able to describe the functional and non-functional characteristics of distributed systems
- Compare and contrast distributed objects with web services

# Review from last week

- **Web applications** are built to interact with browsers
- **Web services** are built to interact with clients that may or may not be associated with a browser
- Web service API styles: **RPC**, **Messaging** and **Resource**
