

## Competition

## Interactions among species

	Species 1	Species 2
Competition	-	-
Predation	+	-
Herbivory	+	-
Mutualism	+	+

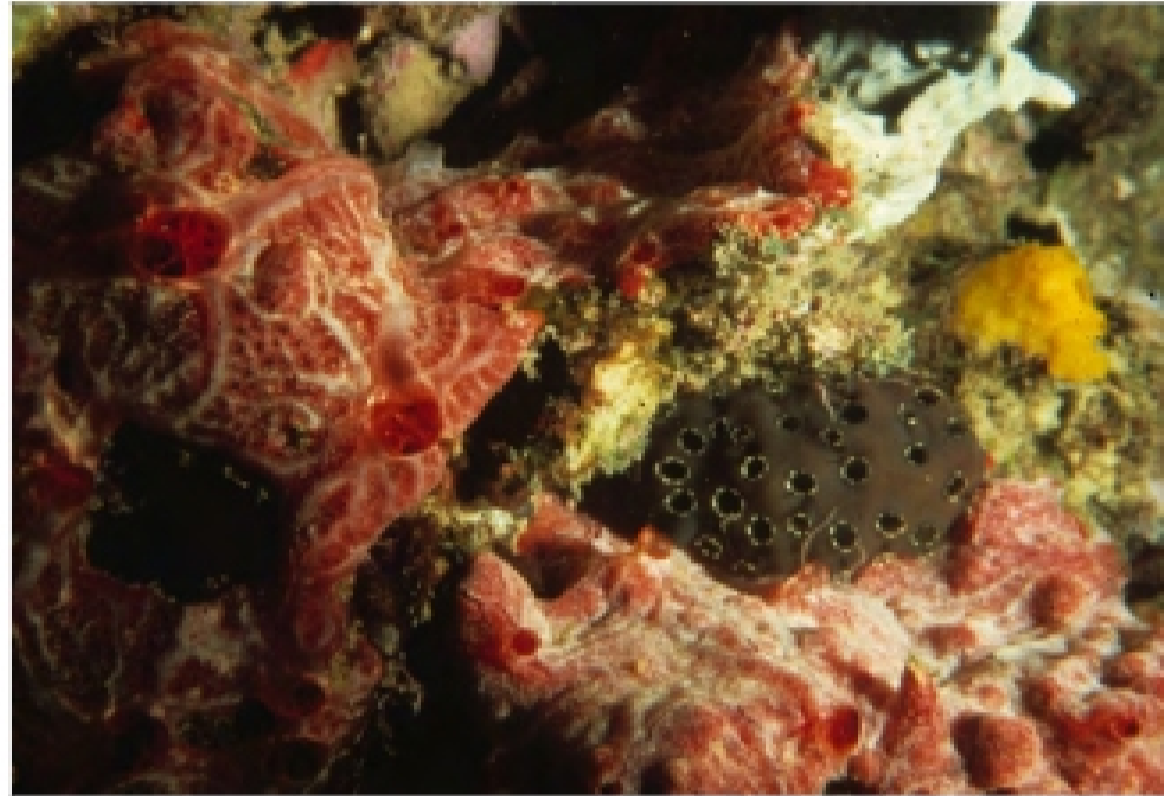

Intra-specific competition : animals compete for food (renewable)  
[intra = competition among individuals of the same species]

Intra-specific competition : animals compete for safe nesting sites  
(non-renewable)

Inter-specific competition : animals compete for sites (non-renewable)  
[inter = competition among individuals of different species]

Intra- and inter-competition : plants compete for light,  
nutrients and water  
(exploitative competition = whoever gets the resource first, wins)
