

How to study effectively:

1. Be Motivated

You have to want to study to get the most out of it! Make sure when you sit down to study your mind is clear and focused.

2. Prioritize

Make sure you are studying the material most likely to be on the exam. Most professors will hint or even give you certain topics to review for your exam. Make sure you have these topics down then move on to additional information.

3. Organize

Have all of your content and materials in one place when you studying.

4. Study Resources

In addition to Flashnotes utilize all of the additional resources you can get on and off campus.

5. Study in Groups

Multiple minds are always more effective than just one. Pull your resources and maximize brain power!
