

CS 430 Software Engineering

Gage Pollard
Zack Hutzell
Matt Williams
Matt Crum

Goals

- Wants to keep track of different documents in a single location
- Wants to allow users to know when documents are being edited
- Wants to prevent multiple editions of the same document from being created
 - Ex. Two users editing the same part of a document

Current Problems

- Latest Version
 - Forgetting to upload new version
- Document Duplication
 - Copying a document to a user's PC and then editing the copy and not changing the original
- Multiple Users
 - More than one person editing a document at the same time
