4	25	
Total	100	

INSTRUCTIONS

1. You have 2 hours to complete this exam.
2. This is a closed book exam. You may use one $8.5'' \times 11''$ note sheet.
3. Calculators are allowed.
4. Solve each part of the problem in the space following the question. If you need more space, continue your solution on the reverse side labeling the page with the question number; for example, **Problem 1.2 Continued**. **NO** credit will be given to solutions that do not meet this requirement.
5. **DO NOT REMOVE ANY PAGES FROM THIS EXAM.** Loose papers will not be accepted and a grade of **ZERO** will be assigned.
6. The quality of your analysis and evaluation is as important as your answers. Your reasoning must be precise and clear; your complete English sentences should convey what you are doing. **To receive credit, you must show your work.**

Problem 1: (25 Points)

- (11 points) Figure 1 shows the block diagram of a feedback control system. Represent the system using an all-integrator block diagram that uses the smallest number of integrators.

Figure 1: Block diagram of a feedback control system.

2. (14 points) Another SISO LTI system with input $u(t)$ and output $y(t)$ is represented by the ODE

$$\ddot{y} + \dot{y} + y = \ddot{u} + \dot{u} + u.$$

Determine a state-space representation

$$\begin{aligned}\dot{x} &= Ax + Bu \\ y &= Cx + Du,\end{aligned}$$

by specifying the matrices A , B , C , and D .
