

Psy 336 Developmental Psychology
Fall 2015
Dr. Ostrov

Review Sheet for Exam 1 (Monday 9/21)
Bring ID and two #2 pencils

Multiple Choice and True/False

Define the following terms:

Development

Continuity

Discontinuity

Endogenous

Exogenous

Plasticity

Dynamic Bi-Directional Interactions

Erickson

Sensitive Period

Critical Period

Early Childhood

Emerging Adulthood

Nature

Nurture

Maturation

Ecological Validity

Validity

Reliability

Cohort

Neonate

Piaget

Piaget's Stages

Object Permanence

Conservation

Zone of Proximal Development

Internal Working Model

Strange Situation

Secure Base

Harlow

Bowlby

Ainsworth

Developmental Niche

Social Learning Theory

Vygotsky

Bandura

Bronfenbrenner's ecological model

Longitudinal

Cross-sectional

Experiment

Visual Cliff

Self-Recognition

Habituation

Random Assignment

Random Selection

EEG

Genome

Genotype

Phenotype

Range of Reaction

Passive G-E Correlation

Evocative G-E Correlation

Active G-E Correlation

DNA

Recessive Gene Transmission

Dominant Gene Transmission

Teratogen

Context

Emic

Etic

Individualistic

Collectivistic

Generative Tension

Symbiotic Harmony
