

MAT 127

Final Exam

December 13, 2010

8:15-10:45am

Name: _____
 first name last name

ID: _____

Section: L01 L02 L03 (circle yours)
 MWF 9:35-10:30am TuTh 5:20-6:40pm TuTh 2:20-3:40pm

DO NOT OPEN THIS EXAM YET

Instructions

- (1) Fill in your name and Stony Brook ID number and circle your lecture number at the top of this cover sheet.
- (2) This exam is closed-book and closed-notes; no calculators, no phones.
- (3) Please write legibly to receive credit. Circle or box your final answers. If your solution to a problem does not fit on the page on which the problem is stated, please indicate on that page where in the exam to find (the rest of) your solution.
- (4) You may continue your solutions on additional sheets of paper provided by the proctors. If you do so, please write your name and ID number at the top of each of them and staple them to the back of the exam (stapler available); otherwise, these sheets may get lost.
- (5) Anything handed in will be graded; incorrect statements will be penalized even if they are in addition to complete and correct solutions. If you do not want something graded, please erase it or cross it out.
- (6) Leave your answers in exact form (e.g. $\sqrt{2}$, not ≈ 1.4) and simplify them as much as possible (e.g. $1/2$, not $2/4$) to receive full credit.
- (7) Show your work; correct answers only will receive only partial credit (unless noted otherwise).
- (8) Be careful to avoid making grievous errors that are subject to heavy penalties.
- (9) If you need more blank paper, ask a proctor.

Out of fairness to others, please **stop working and close the exam as soon as the time is called**. A significant number of points will be taken off your exam score if you continue working after the time is called. You will be given a two-minute warning before the end.

Some Taylor Series

$$\frac{1}{1-x} = \sum_{n=0}^{\infty} x^n \quad \text{if } |x| < 1$$

$$e^x = \sum_{n=0}^{\infty} \frac{x^n}{n!}$$

$$\cos x = \sum_{n=0}^{\infty} \frac{(-1)^n x^{2n}}{(2n)!}$$

$$\sin x = \sum_{n=0}^{\infty} \frac{(-1)^n x^{2n+1}}{(2n+1)!}$$

to receive full credit, justify any other power series expansion you use

1 (10pts)	
2 (10pts)	
3ab+c (20pts)	
4 (20pts)	
5 (20pts)	
Subtotal (80pts)	

6abc+d (10pts)	
7 (20pts)	
8 (10pts)	
9 (10pts)	
10A/B (20pts)	
Subtotal (70pts)	

Total (150pts)	
-----------------------	--

Problem 1 (10pts)

Answer Only. Determine whether each of the following sequences or series converges or not. In each case, *clearly* circle either **YES** or **NO**, but not both. Each correct answer is worth 2 points. You may use the blank space between the questions to figure out the answer, but no partial credit will be awarded and no justification is expected for your answers on this problem.

(a) the sequence $a_n = 1 + \frac{\cos^3 n}{n}$ **YES** **NO**

(b) the sequence $a_n = n^2(1 - e^{1/n})$ **YES** **NO**

(c) the series $\sum_{n=1}^{\infty} \frac{n + (-1)^n}{n^2 + 1}$ **YES** **NO**

(d) the series $\sum_{n=1}^{\infty} (-1)^n \frac{n}{2n + 1}$ **YES** **NO**

(e) the series $\sum_{n=1}^{\infty} \frac{2^n}{\sqrt{3^n + 5^n}}$ **YES** **NO**
