

# Global Warming Module 2

SCI 230

Dr. Friese

# Goals and Objectives

- Goal:
  - The ultimate goal is for students to view the “big picture.”
  - Students should learn how seemingly separate issues actually relate through “feedback loops.”
- Objectives: The Students will
  - Create a diagram that shows the various relationships possible among the terms given.
  - Identify that there are multiple ways to connect these terms and how almost all can be affected by just one change in the environment.

# Pre-Class Assignment

- Students should locate and read two articles: “Color Blindness” and “The Hottest Spot”
- Both articles available through Audubon:
