

Dataquest Guide: Public Network Infrastructure Methodologies and Definitions, 2006

Deborah Kish, Frank Fabricius, Sylvain Fabre, Jouni Forsman, Peter Kjeldsen

This document describes the segmentation and forecast methodologies Gartner uses when analyzing the world market for public network infrastructure. It also defines the many terms for equipment, systems and software.

TABLE OF CONTENTS

1.0 Overview.....	5
2.0 Market Forecasting Methodology.....	6
3.0 Public Network Infrastructure.....	7
3.1 Switching and Routing.....	7
3.2 Transport.....	8
3.3 Access.....	8
3.4 Signaling.....	8
3.5 Support Systems.....	8
3.5.1 Business Support Systems.....	8
3.5.2 Operational Support Systems.....	9
4.0 Switching and Routing.....	9
4.1 Next-Generation Switching Systems.....	9
4.2 Market Quantification.....	10
4.3 Network Topology.....	10
4.4 Softswitch Architecture.....	11
4.4.1 Softswitch.....	11
4.4.2 Media Gateways.....	12
4.4.2.1 Access Media Gateway.....	12
4.4.2.2 Signaling Gateway/IP-STP.....	13
4.4.2.3 Trunk Media Gateway.....	13
4.4.3 Voice Application Servers.....	13
4.4.3.1 IP-Service Control Point.....	13
4.4.3.2 IP Centrex Platforms.....	14
4.4.4 Intelligent Peripheral (Media Server).....	14
4.4.5 Session Border Controllers.....	15
4.4.6 Multi-Service Switch.....	15
4.4.6.1 Core MSS.....	16
4.4.6.2 Edge MSS.....	16
4.4.7 Carrier Grade Ethernet Switches (10-Gigabit Ethernet Switches and Layer 2 Switches).....	16
4.5 Routers.....	17
4.5.1 High-End Routers.....	17
4.5.2 Service Provider Routers.....	17
4.5.3 Core Routers.....	17
4.5.4 Edge Aggregation Routers.....	18
4.5.5 Broadband Aggregation/IP Service Routers.....	18
4.5.6 Multiservice Edge Router.....	18
4.6 Current-Generation Switching.....	19
4.7 Market Quantification.....	20
4.8 Revenue.....	20
5.0 Signaling.....	21
5.1 Service Control Point.....	21
5.2 Service Management System.....	22
5.3 Service Creation Environment.....	22
5.4 Service Node.....	22
5.5 Service Switching Point.....	22
5.6 Signal Transfer Points.....	22
5.7 Location Registry for Wireless Networks.....	22

6.0 Access Network Systems	23
6.1 DSL	23
6.1.1 DSL Technologies	23
6.1.1.1 Asymmetric DSL	23
6.1.1.2 ADSL2	24
6.1.1.3 ADSL2+	24
6.1.1.4 Global Standard High-Bit Rate DSL	24
6.1.1.5 Very High-Bit Rate DSL	24
6.1.1.6 Others	24
6.2 DSL CO Equipment	24
6.3 DSL CPE Units	24
6.3.1 CPE Internal Modem	25
6.3.2 CPE External Stand-Alone Modem	25
6.3.3 CPE Business DSL Router With Embedded DSL Modem	25
6.3.4 Residential/Small Office Gateways/Router With Embedded DSL Modem	25
6.3.5 DSL/Cable-Sharing Residential/Small Office Gateways/Router	25
6.3.6 Voice Enabled-Residential/Small Office Gateway/Router With Embedded DSL Modem	25
6.4 HDSL, HDSL2 and HDSL4	26
6.5 Cable Broadband Access Systems	26
6.6 Cable Modem Termination System	27
6.7 Fiber Nodes in HFC	28
6.8 Downstream and Upstream Channels	28
6.9 Cable Modem CPE	28
6.9.1 Cable Modem	28
6.9.2 External Cable Modem	29
6.9.3 Cable Modem Router or Cable Gateway CPE	29
6.9.4 DOCSIS Set-Top Gateway	29
6.9.5 Embedded Multimedia Terminal Adapter	29
6.9.6 MTA/ATA Devices	30
6.9.7 Stand-Alone MTA	30
6.9.8 Gateway	30
6.10 Cable Modems Standards	30
6.10.1 DOCSIS	30
6.11 Other Relevant Cable Standards	31
6.11.1 PacketCable	31
6.11.2 CableHome	31
6.12 Broadband Fixed Wireless Systems	31
6.12.1 Sub-11GHz Proprietary BWA	31
6.12.2 WiMAX-Certified Sub-11GHz BWA	31
6.12.3 Worldwide Interoperability for Microwave Access	34
6.12.4 WiBro	34
6.13 Free-Space Optics	34
6.14 Fiber in the Loop	34
6.15 Passive Optical Networks	35
6.16 Point-to-Point FITL Systems	35
6.17 Fiber to the Business	35
6.18 Fiber to the Premises	35
6.19 Fiber to the Node	35
6.20 FTTC Installations	35
6.21 Multiservice Access Platforms	35
6.22 Low-Density Access Media Gateway	36
