

Exam 3 Study Guide

Chapter 9: Intelligence

- Know Spearman's views on intelligence (e.g. general, specific, crystallized, and fluid)
- Know Sternberg's types of intelligence
- Know the Flynn Effect
- Know Terman's study on gifted children
- Know the IQ formula and the origins of the IQ test
- Know the basics of eugenics
- Review the diagnosis of mental retardation

Chapter 10: Development

- Know the very basics about the stages of prenatal development
- Know the difference between primary and secondary sex characteristics
- Know the slides titled "Motor Development" (2 slides and 1 picture slide)
- Know the slides titled "Attachment" and "Attachment Theory" (all 3 slides)
- Know the different parenting styles
- Will need to know Piaget's theory in detail
 - Do not worry about the first couple slides on Piaget; start studying Piaget on the slide entitled "Assimilation and Accommodation"
 - Do not worry about criticisms of his theory
 - Focus in depth on the 4 stages of development and things that occur within those stages (e.g. object permanence and others)
- Know Kohlberg's stages of moral development

Chapter 13: Social

- Understand the difference between conformity and obedience
- Know results/findings from Milgram's obedience study
- Know the slides titled "Bystander Nonintervention" and "Social Loafing"
- Understand the slides titled "Deindividuation," "Stanford Prison Study," and "Groupthink"
- Know about the concepts of social facilitation and elevation (not necessarily related)
- Understand cognitive dissonance theory, self-perception theory, and impression management theory
- Know the differences between prejudice, discrimination, and stereotypes
- Know the basics of attribution (e.g. dispositional vs. situational attribution)
- Know the basic definition of "attitude"
- Understand the basics of the just-world hypothesis and the scapegoat hypothesis
- Know the different routes of persuasion
- Know the different types of aggression

*Hint: there is one question for which you will need to go back and look at the difference between reliability, validity, and falsifiability

*Coming to class will give you a distinct advantage on at least 4-5 questions. I tried to set this test up to reward those of you who are coming to class.

*There are about 10 questions on the intelligence chapter, around 20 on development, and approximately 20 on social psych
