

Trustworthy Semantic Webs

Dr. Bhavani Thuraisingham

The University of Texas at Dallas

Introduction to the Course

Outline of the Course

Trustworthy Semantic Webs:

Prof. Bhavani Thuraisingham

Contents

Introduction to the Course

Part I: Supporting Technologies

Trustworthy Systems

Secure Data and Information Management

Secure Web and Information Retrieval Systems

Part II: Semantic Webs

Overview of Semantic Webs

Components of the Semantic Web

XML, RDF, Ontologies, Rules

Applications

Conclusion to Part II

Outline of the Course

Part III: Secure Semantic Web

Overview of Secure Semantic Webs

Components of Secure Semantic Web

XML Security, Securing RDF Documents, Secure Ontologies

Secure Web Rules, Inference Problem

Multilevel Security and Malicious Attacks

Part IV: Dependable Semantic Webs

Trust Management

Privacy and Platform for Privacy Preferences

Data Provenance and Integrity Management

Part V: Secure Semantic Applications

Secure Semantic Interoperability

Secure Web Services

Secure Knowledge Management and E-Business

Conclusion to the Course
