## Lecture 2

### Introduction and Basic Definitions

August 29, 2016

# Practice Problems

At the end of each section there are a set of Practice Problems.

These problems reemphasize the concepts that have been discussed in the material proceeding them. **You should work these problems outside of class to best prepare for the tests.**

Solutions can be found in the back of the supplement.

**Relevant** problems are practice problems associated with that day's lecture. **Recommended** problems are problems similar to test questions.

# Practice Problems

Pages 9 and 10

Relevant problems: I.1 through I.5

Recommended problems: I.1, I.3, and I.4
