HINTS AND SUGGESTIONS – GETTING STARTED:

- 1) When you have the **palette with the math symbols** to enter answers, the top row is actually a menu of choices. Click on the square root symbol and you will see a template for any root as a choice.
- 2) If you are having trouble with the **login name**, remember your login name is your email address. The whole email address you typed in when you registered.
For example, 'beststudent@purdue.edu' not just 'beststudent'.
- 3) **How many times you attempt a problem** or a whole assignment has **no effect or penalty on your grade**. Until the due date, you can try any problem or assignment as many times as you want. You can redo problems you miss as many times as you like and thus improve your grade. You can also print off problems and then work on them later. If you logout, the problems you missed will be regenerated with the numbers changed the next time you take the assignment.
- 4) **The biggest difficulty** students seem to have is in **typing their correct answers into the system** the way the iLrn system wants the answer specifically typed in. This problem usually occurs on only a very few of the problems though. Be persistent. Check to see how the answer is written in the back of your book.
- 5) ****Try using campus computer labs**. Some browsers and computers function better with the iLrn system than others. Also, slower dial-up connections will not likely work very well with the system.
- 6) When you login to iLrn, on the 'Assignments' page in the 'score' column there is a 'details' link that will allow you to **view problems and your answers as well as the correct answers** for the assignments you have tried.

NOTE: The details lists your answer twice, so read that page carefully.

Assignment 1 is due September 5th.
