

# Prototyping: alternative systems development methodology by J M Carey

Presented by Cynthia  
Johnson

February 7, 2007 EEL 6883

# What is Prototyping?

- “Prototyping’ is the process of quickly building a model of the final software system, which is used primarily as a communication tool to assess and meet the information needs of the user?” – J M Carey

# What is prototyping?

- “Prototyping is the use of approximately 30% of the ultimate staff to build one or two working versions of various aspects of a system. It is not production code but it may eventually become pre-production code or it may be completely discarded. In the prototyping effort, we are not concerned with the maintainability of the code nor are we concerned with formally documenting it.” – Larry Bernstein
