

Models for Digital Libraries

CSC 9010 - week 2

The 5S model is the work of Edward A. Fox and his students at Virginia Tech. These slides rely heavily on that work.

Week 2 goals

- Discuss reading of “As we may think”
- Review of points in the discussion of What is a Digital Library?
- Introduce a formal model of digital libraries
- Use the 5 S model to direct thinking about the design of a DL
- Briefly introduce systems to be used

Our systems

- 7 linux machines, remotely accessible
- Bare machines with just basic system
- We will install apache and the rest of the web infrastructure, as well as the DL software.
- Detailed instructions will be available next week.
