

# IS 2150 / TEL 2810

## Introduction to Security

James Joshi  
Associate Professor, SIS

Lecture 7  
Oct 4, 2011

Basic Cryptography  
Network Security

# Objectives

---

- Understand/explain/employ the basic cryptographic techniques
  - Review the basic number theory used in cryptosystems
  - Classical system
  - Public-key system
  - Some crypto analysis
  - Message digest

# Secure Information Transmission (network security model)
