

# Introduction to Rational Rose 2000

## Create Use Case Model

# Module Objectives

---

- ◆ Define the elements of the use case model.
  - Use cases
  - Actors
  - Relationships
  - Use case diagrams
- ◆ Add diagrams to the Use Case View.
  - → Create Packages and place 'appropriate' or 'like' use cases in same package.
  - Link Use Case narratives using Requisite Pro.

# Where Are We?

Use Cases and Actors are identified and briefly outlined during early stages of inception.

Some Architecturally-significant Use Cases are described in detail during Inception phase;

About 80% of Use Cases are done by end of Elaboration. Construction addresses other scenarios/paths...

Analysis and Design Workflow Use Case model is continuously updated and refined.
