

Intro to Computer Science II
CS112-2012S-02
Creating Classes

David Galles

Department of Computer Science
University of San Francisco

02-0: Java Programs

- Java programs are a collection of classes
 - Each class is a *Template*, not an *Object*
 - Can't use a class until we create an instance (call "new")
- One exception: Static Methods
- In this course, we will only use one static method: main method

02-1: Java Programs

- Simplest Java Program:
 - Hello World 3 ways
