EVAL 6970: Meta-Analysis
Formulating a Problem, Coding the Literature, and Review of Research Designs

Dr. Chris L. S. Coryn

Spring 2011

Agenda

- Formulating a problem
- Coding the literature
- Review of research designs
- In-class activity
- Next meeting

Formulating a Problem

- Like any research, meta-analysis should begin with a careful statement of the topic to be investigated or the question to be answered
- This statement will guide study selection, coding of information, and data analysis
