Final Exam list posted

- You *must* notify us of conflicts in a timely fashion

P3 milestones (completed, right?)

- Read handout, re-read k-spec
- Chosen 3+ weekly joint hacking sessions
- Set up source control repository
- Rough-draft division of labor, rough pseudo-code/outlines
- Typed *some* code...?

Book report topic chosen? Great for airplane time...

Summer internship with SCS Facilities?

A Word on the Final Exam

Disclaimer

- Past performance is not a guarantee of future results

The course will change

- Up to now: “basics”
 - What you need for Project 3
- Coming: advanced topics
 - Design issues
 - Things you won't experience via implementation

Examination will change to match

- More design questions
- Some things you won't have implemented
