

Personal Software Process Overview

CIS 376

Bruce R. Maxim

UM-Dearborn

Process Improvement

1. Define the quality goal
2. Measure product quality
3. Understand the process
4. Adjust the process
5. Use the adjusted process
6. Measure the results
7. Compare results to goal
8. Go to step 4 and continue improvements

These notes are based on:
Introduction to the
Personal Software Process
Watts S. Humphrey
Addison-Wesley Longman (1997)
