School of Engineering

Parallel and Distributed Processing

CSE 8380

February 1 2005

Session 6

Contents

- Performance Evaluation
 - Grosch's Law
 - Moore's Law
 - Von Neumann's Bottleneck
 - Parallelism
 - Speedup
 - Amdahl's Law
 - The Gustafson-Barsis Law
 - Benchmarks

Grosch's Law (1960s)

- “To sell a computer for twice as much, it must be four times as fast”
- Vendors skip small speed improvements in favor of waiting for large ones
- Buyers of expensive machines would wait for a twofold improvement in performance for the same price.
