

"Hello Ajax"! How to Do the Ajax Thing with Oracle JDeveloper

Building an Synchronous Ajax page

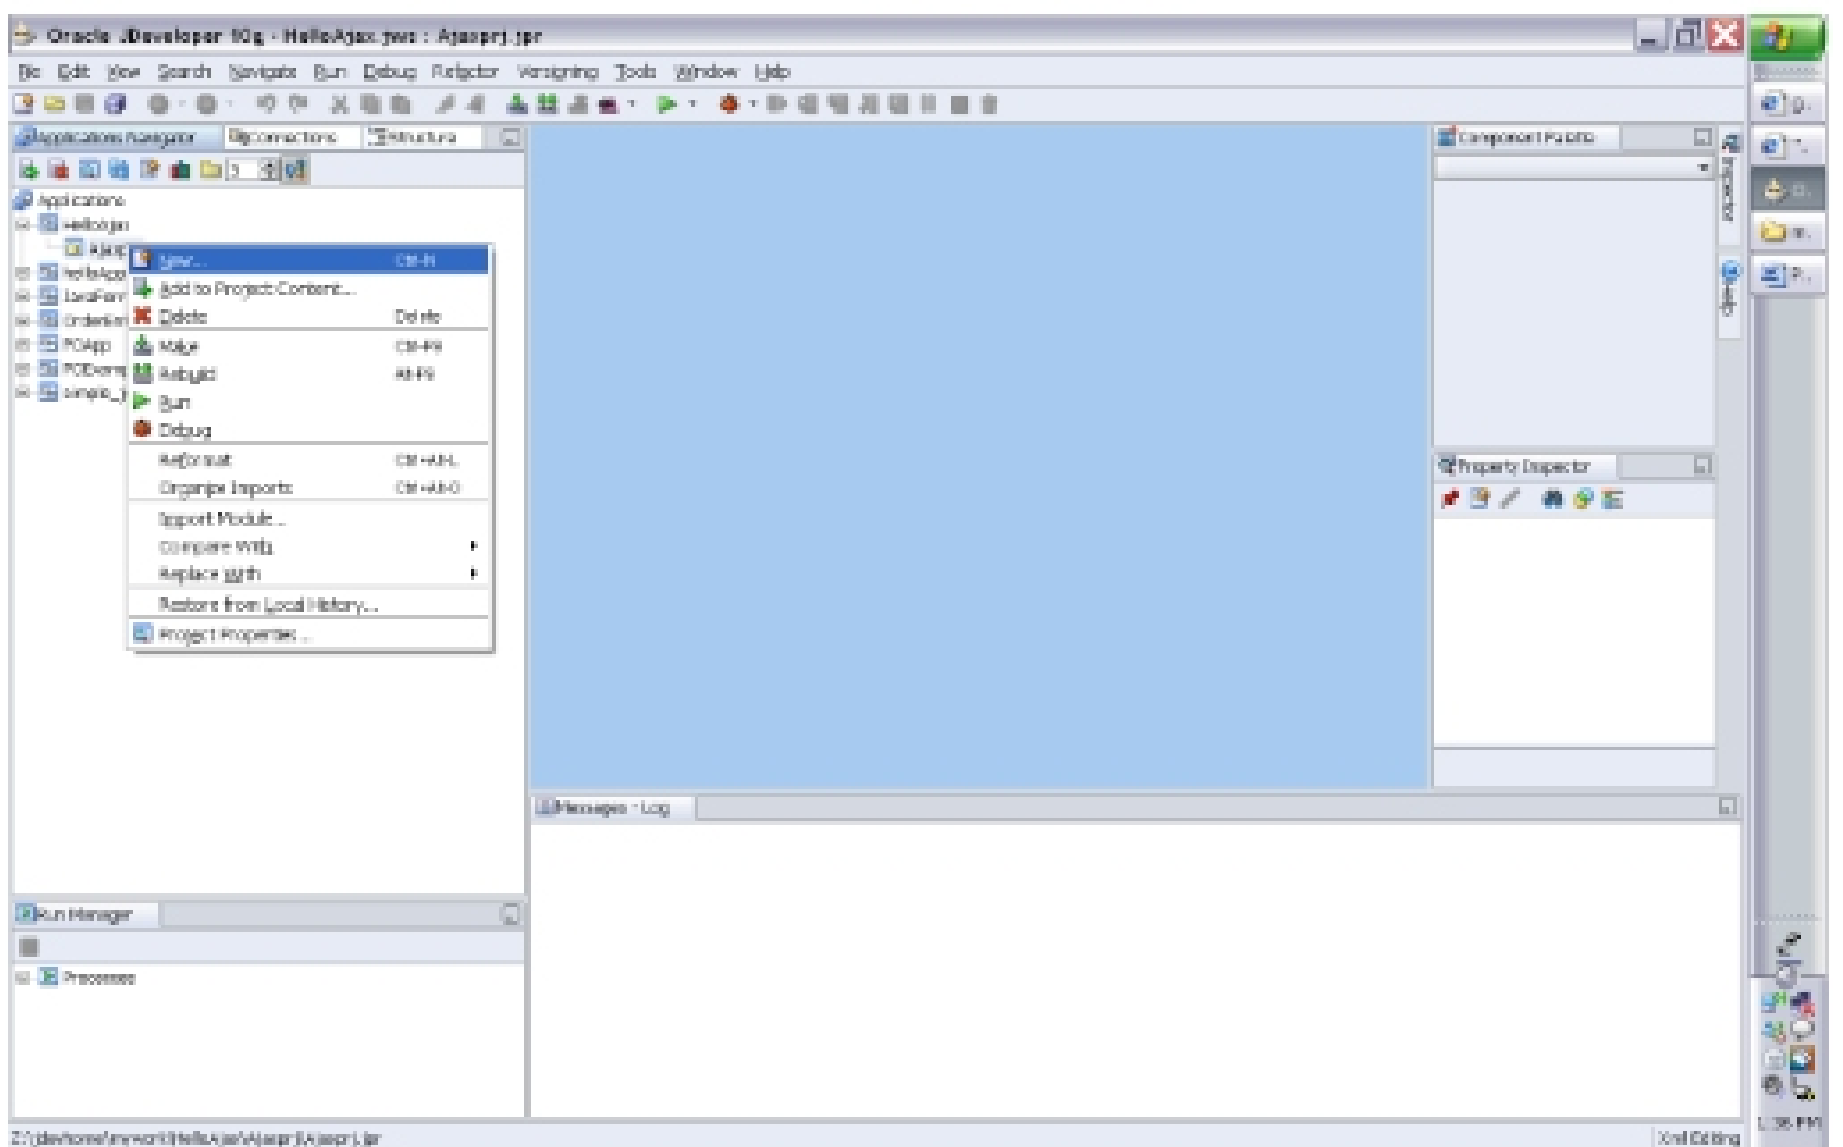

- 1) Open a new application by selecting File->New->New Application
- 2) Application Name: HelloAjax
- 3) Application Package Prefix: com.oracle.ajax.sample
- 4) Application template: No Template [All Technologies]

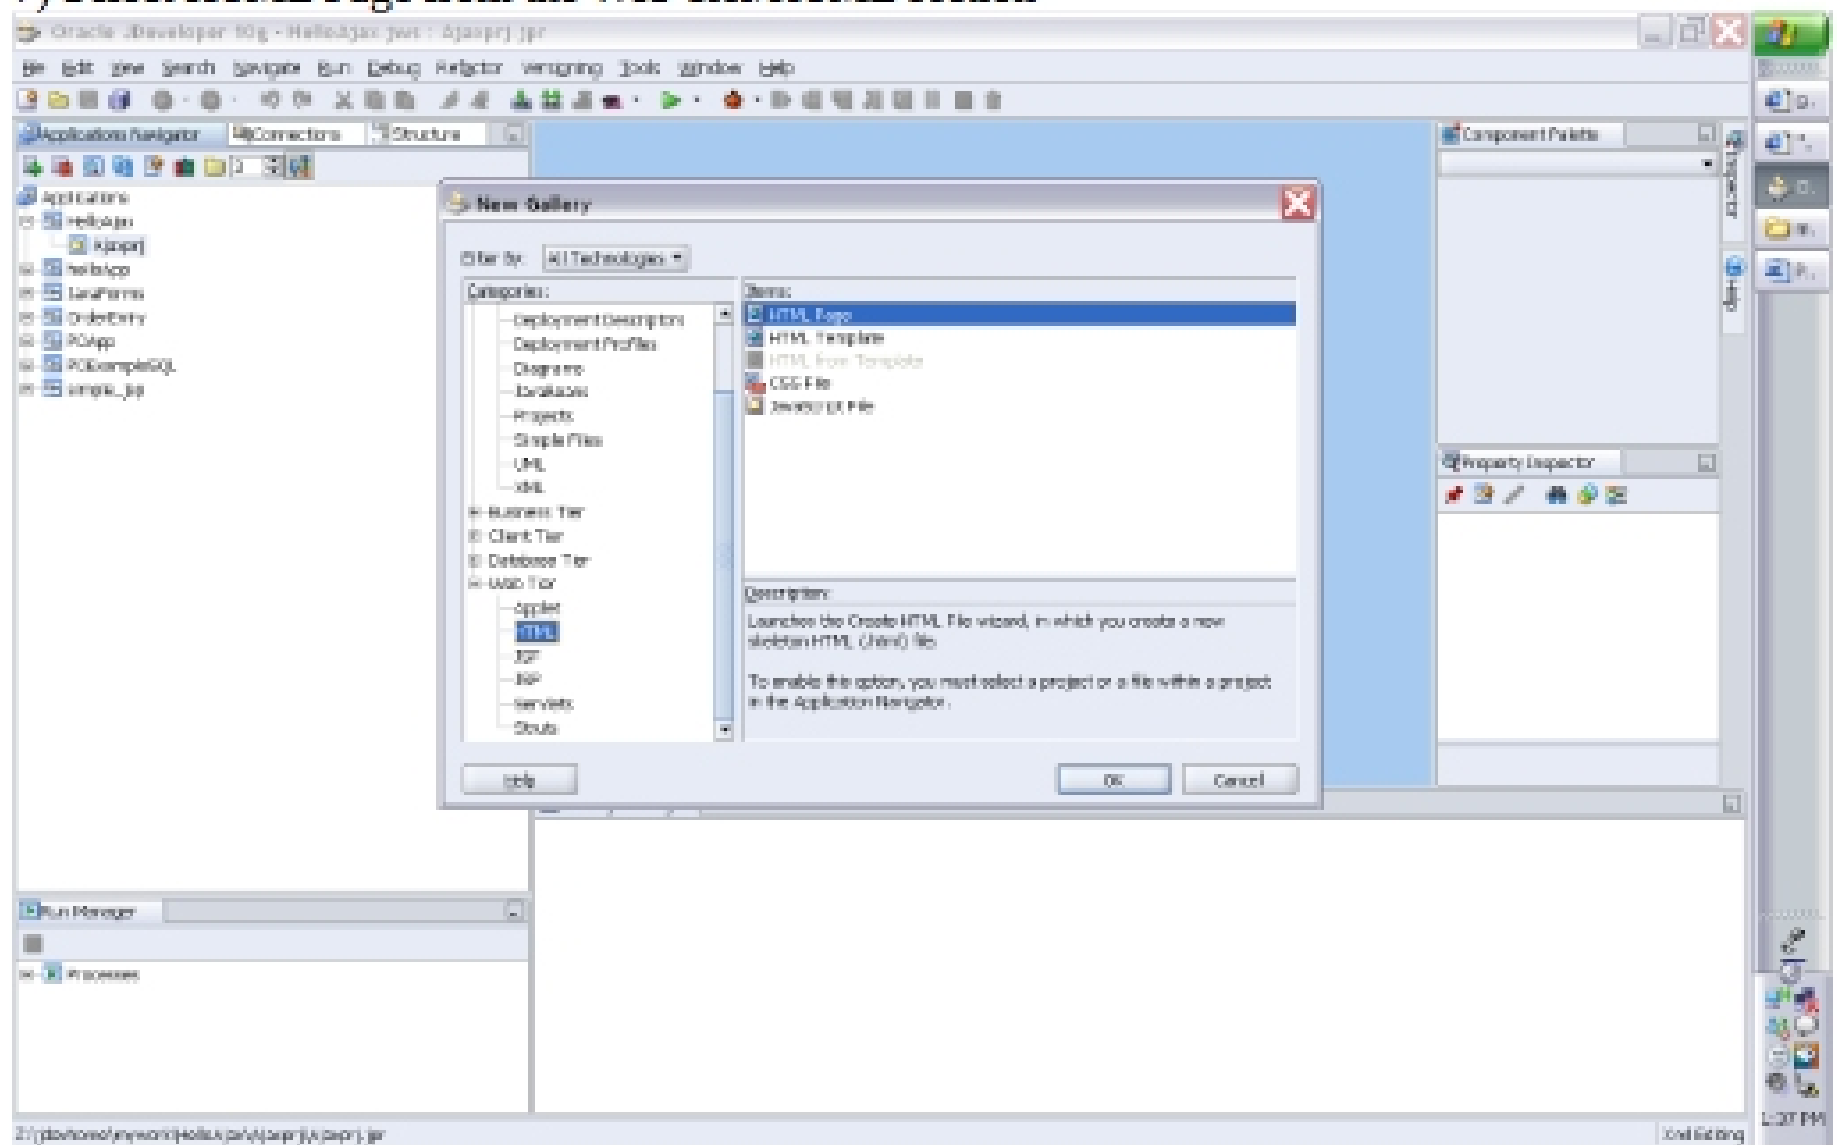

5) Enter project name: Ajaxprj

6) Expand the HelloAjax Node -> select New for project Ajaxprj

7) Select HTML Page from the Web Tier/HTML section

8) Use the HTML wizard to create an HTML page
