## Python Intro

# This presentation taken partly from:

## Introduction to Python I

CSE-391: Artificial Intelligence  
University of Pennsylvania

Matt Huenerfauth

January 2004

# What is Python?

- A programming language with strong similarities to PERL, but with powerful typing and object oriented features.
  - Commonly used for producing HTML content on websites. Great for text files.
  - Useful built-in types (lists, dictionaries).
  - Clean syntax, powerful extensions.
