Exercise 84: Issue Goods to Production Order

Purpose of Exercise
Goods being issues to the production order consumes them from inventory. The BOM defined the standard what should be used to make the finished goods times the quantity being made. This is the standard and barring any production changes, what is going to be consumed in the making of the finished goods. Once issued the costs of the material are assumed by the production order and the raw material inventory is decremented.

Navigation

Menu Path	Logistics @ Production @ Shop Floor Control @ Goods Movements @ Goods Issue
Trans Code	MB1A

Enter the following information:

- Posting Date Today
