

# Thurs, 25 Feb: Assignment Reminder

- Read Unit 5 papers (in file drawer) by Tues 2 Mar:
  - Goldberg, McCarthy, Hudak
    - Functional, Recursive functions, Haskell
- Write (due Thurs, 4 Mar):
  - Haskell and ML handle type inferencing and polymorphism differently. Haskell maps to abstract types while ML maps to concrete types. Explain what this means and address which method, if either (feel free to suggest alternatives), is better.

# Today's Topics

- Ms. Joan Ruelle: SciTech
- $\lambda$  calculus?
