digital

- Software Risk Management authority:
 - safety, security, reliability
 - services and technology for making software behave
- Clients include:
 - Visa, Agile, Microstrategy, Ericsson, Motorola, Microsoft, NSF, DARPA, NIST's Advanced Technology Program

Why use mobile code?

- Offload processing from servers
 - CGI bottlenecks
 - look and feel problems
 - cross-platform solution desirable
- Mobile devices
 - Phones
 - Smart cards
 - PDAs
- Managing highly interconnected distributed systems
 - the famed Internet toaster
 - IP numbers for everything!
 - we've only scratched the surface
