

Geodesic Snakes

Level-Set Evolution

CS7960

Advanced Image Processing

April 8th, 2010

Jonathan Bronson

Content

- Motivation
- Implicit Contour Formulation
- Hypersurface Embedding
- Examples
- Conclusions

Motivation

- Drawbacks of previous Snake formulations:
 - Explicit Representation
 - Parameterization / Reparameterization issues
 - Approximating Discrete Derivatives
 - Fixed Topology
 - Extension to 3D very complex (active meshes)
