Geodesic Snakes

Level-Set Evolution

CS7960
Advanced Image Processing
April 8th, 2010

Jonathan Bronson

Content

- Motivation
- Implicit Contour Formulation
- Hypersurface Embedding
- Examples
- Conclusions

Motivation

- Drawbacks of previous Snake formulations:
  - Explicit Representation
    - Parameterization / Reparameterization issues
    - Approximating Discrete Derivatives
  - Fixed Topology
  - Extention to 3D very complex (active meshes)
