

# Final Project Information

55:036

Embedded Systems and System  
Software

## Final Project

- Conducted during the last three weeks of class
- Assignment: Design and implement an embedded application of your choosing
- Constraint: Your system must include at least one of the following:
  - Use of a PIC feature not used in previous labs—e.g. CCP unit
  - Use of a protocol not used in labs—e.g. I<sup>2</sup>C
  - Use of a peripheral chip not used in lab
- Scope/complexity of your application must be at least comparable to that of lab 5 and lab 6.
- Stretch yourselves--more points will be awarded to more ambitious projects

## Final Project

- Important Dates:
  - Project proposals due on Tues, April 10
  - Provide enough detail to allow me to assess the scope and feasibility of your proposed design
  - Project proposal must be approved, before you can proceed with your project
    - Proposals will be approved/declined by Thursday, April 12
  - Proposals may be submitted any time prior to the deadline to expedite approval and ordering of parts.

## Final Project

- Important Dates (Continued):
    - Project Report due date is Friday, May 4 by 5:00 p.m.
      - Report format essentially same as for lab reports
      - Make sure that you provide sufficient detail regarding project specification and design.
    - Last project demonstration/ sign-off date is Thursday, May 3
    - In-class presentations: T, May 1, Th, May 3
- Note: There is no Pre-Lab requirement for the Final Project**
