

Soils

Created by J. Hartnett

1. Name and describe the soils one might expect to find in a **tundra** environment.
2. What is an **entisol**? How is this soil type different than **ultisols**?
3. Draw the typical soil profile for **spodosols**. Where are these soils found? Why do the horizons look like they do?

Soils

4. Compare and contrast **mollisols** and **aridisols**. Include where each are found, and why.

Mollisols	Aridisol

5. Which soil type is **homogeneously** mixed (i.e. no horizons)? Explain how this occurs.

6. Where do we tend find **alfisols**?
