

Intro to Programming II
Structs

Chris Brooks

Department of Computer Science
University of San Francisco

21-2: Structs

- In Java, you create new data types by creating classes.
 - Classes have member variables and associated methods.
 - You can control access, and inherit.
- C has structs.
 - Member variables only (no methods)
 - No means of hiding information (public/private)

21-3: Structs example
