

I would advise students that are starting this course to pay close attention to everything that you are given. I would tell students to read and comprehend all the assignments given. I would tell them to make sure that if you do not understand something you ask someone. I would tell students starting this course to work on their final project as advised on a weekly basis, that way when the last week comes you would not be unprepared and rushing trying to get your project done in a week. I would let students know that this course is not to be taken lightly and requires all your attention and concentration.

If I were to just starting the course I would make sure that I turned in all of my assignments on time. I would make sure that I understood my final project fully, and make sure that I was doing everything to ensure my final project was not difficult to complete. I would focus more on the rough draft and the grammar part of my assignments. I would make sure that the grammar exercises that I completed were used on a daily basis. I would focus more on my writing skills as a whole, by paying close attention to the APA guidelines, and using more of the CWE as a guide.

There would not be any assignment or exercise that I would focus less on because every piece of information given is crucial in understanding this class and writing in general. I would focus on more on the areas that I am weak in rather than the ones I have a general knowledge and understanding. I would want to improve in those areas but I would want to make sure that the areas that I am less sure and strong in I concentrate more on.
