## **EXECUTIVE SUMMARY**

The executive summary must be exactly one page long – no more no less. It should be composed of four paragraphs. The first paragraph contains an overview of the problem (not the approach).

The second paragraph contains an overview of the design constraints. The goal of this paragraph is to make sure the reader understands the key technical challenges.

The third paragraph contains an overview of the approach you are taking to solve the problem. How do you plan to meet your key design constraints? The second and third paragraphs are the longest.

The last paragraph contains an overview of the novelty of your design. This is a fairly short paragraph that summarizes innovation in your project. What other things can be done to improve your design; what will be the impact of success, etc. This paragraph should be about four sentences.

There must be

## TABLE OF CONTENTS

|           |   |          |
|-----------|---|----------|
| <b>1.</b> | <b>PROBLEM</b> .....  | <b>1</b> |
| <b>2.</b> | <b>DESIGN REQUIREMENTS</b> .....                              | <b>1</b> |
|           | 2.1. Technical Design Constraints .....                       | 1        |
|           | 2.2. Practical Design Constraints .....                       | 1        |
| <b>3.</b> | <b>APPROACH</b> .....   | <b>2</b> |
|           | 3.1. DC Power Supplies .....                                  | 3        |
|           | 3.2. Hardware Design .....                                    | 4        |
|           | 3.3. Software Design .....                                    | 5        |
