

Flashcard Organization System

By: Jennifer Nagy
Michael Agius

Goals and Objectives

- System for the storage and retrieval of “flashcards” to aid a student in the organization of study materials.
- Reduce the clutter associated with the transportation and organization of standard 3x5 index cards.

Why would we want this?

- Index cards are hard to organize and transport.
- The more you have the easier it is to lose them.

- The same amount of data fit onto one disk. →
