

# Creating new worlds inside the computer

COS 116, Spring 2012  
Adam Finkelstein

# A couple tips....

- Use Piazza! (Even for private questions.)
- Send lab reports and homeworks to [pu.cos116@gmail.com](mailto:pu.cos116@gmail.com)

# Pseudocode

- Simple instructions: involve  $+$ ,  $-$ ,  $\times$ ,  $\div$
- Compound instructions
  - Conditionals
  - Loops
- No need to sweat over exact wording during exams (unless it changes meaning!)
- See pseudocode handout on course web page
