

## Introduction to XHTML

**very basic xhtml**

- xhtml
- your browser received web pages from \_\_\_\_\_ in an encoded form and then converts them to the images you see online
- web creation software: <http://website-creation-software-review.toptenreviews.com/>
- why you should be interested in learning html?
- what you need to: simple editor like notepad, a browser, and the interest
- open notepad and let's get started

**the basic tags**

```
<html>
<head><title> ... the title on your website ... </title></head>
<body>
.... the body of your text goes here ...
</body>
</html>
```
